Professional Summary

AI and Data Science graduate with hands-on experience in machine learning, natural language processing, and data-driven modeling. Experienced in building scalable AI systems and end-to-end machine learning solutions using Python, deep learning frameworks, and modern deployment tools.

Education

CMR Institute of Technology, Hyderabad

Nov 2021 - May 2025

Bachelor of Technology in Artificial Intelligence and Data Science

Skills

Machine Learning and Artificial Intelligence: Machine Learning, Deep Learning, Natural Language Processing (NLP), Feature Engineering, Exploratory Data Analysis (EDA)

Libraries and Frameworks: TensorFlow, Scikit-learn, Hugging Face Transformers, spaCy, NumPy, Pandas, Matplotlib, Seaborn, SentenceTransformers

Programming & Problem Solving: Python, SQL, JavaScript, Data Structures & Algorithms, Java (Working Knowledge), C++ (Working Knowledge)

Deployment and Tools: FastAPI, REST APIs, Git, GitHub, VS Code, Vercel, Hugging Face Spaces

Top Projects

Portfolio - AI Powered Portfolio Website with Personalized Chatbot 🔗: Developed a full-stack AI portfolio using React and FastAPI with a personalized chatbot trained on a custom Q&A knowledge base. Implemented a retrieval-augmented generation (RAG) pipeline using SentenceTransformers and a fine-tuned T5 model, and deployed the system on Vercel and Hugging Face Spaces for real-time interaction.

Memlore AI - Memory-Based Personal AI Assistant 🔗: Developed a full-stack AI assistant that stores and retrieves user-specific information through natural language queries by building an end-to-end system using FastAPI and React, integrating a PostgreSQL (Neon) database with NLP processing via spaCy and a custom memory retrieval pipeline, implementing JWT-based authentication and OAuth (Google & GitHub), and deploying the application on Vercel and Hugging Face Spaces for real-time interaction.

ML Drift Monitor - Machine Learning Monitoring System 🔗: Built an end-to-end ML monitoring pipeline that trains models on tabular datasets and detects feature and prediction drift using KS tests and Population Stability Index (PSI), generating automated drift reports for model reliability.

Achievements & Certifications

Top Coder - College Coding Tracker 🔗: Ranked in the top 7% (81st out of 1,132 students) in the college coding leaderboard, demonstrating strong problem-solving ability, algorithmic thinking, and consistent competitive programming performance.

CodeChef - Competitive Programming 🔗: 2-star rated competitive programmer with 1500+ problems solved and 50+ contest participations, maintaining daily problem-solving practice to strengthen algorithms, data structures, and coding efficiency.

Machine Learning Specialization - DeepLearning.AI (Andrew Ng) 🔗: Completed hands-on training in supervised and unsupervised learning, model evaluation, and ML workflows using Python.

Deep Learning Specialization - DeepLearning.AI (Andrew Ng) 🔗: Covered neural networks, CNNs, sequence models, backpropagation, and optimization techniques for training deep neural networks.

Natural Language Processing Specialization - DeepLearning.AI (Andrew Ng) 🔗: Learned text processing, transformers, attention mechanisms, and sequence modeling techniques for real-world NLP applications.
