Professional Summary

AI and Data Science graduate with hands-on experience in machine learning, natural language processing, and data-driven modeling. Experienced in building scalable AI systems and end-to-end machine learning solutions using Python, deep learning frameworks, and modern deployment tools.

Education

CMR Institute of Technology, Hyderabad

Nov 2021 - May 2025

Bachelor of Technology in Artificial Intelligence and Data Science

Skills

Machine Learning and Artificial Intelligence: Machine Learning, Deep Learning, Natural Language Processing (NLP), Computer Vision, Neural Networks (CNNs, RNNs), Supervised and Unsupervised Learning, Feature Engineering, Exploratory Data Analysis (EDA), Semantic Search

Libraries and Frameworks: TensorFlow, Scikit-learn, Hugging Face Transformers, spaCy, OpenCV, NumPy, Pandas, Matplotlib, Seaborn, SentenceTransformers

Programming & Problem Solving: Python, SQL, JavaScript, Data Structures & Algorithms, Java (Working Knowledge), C++ (Working Knowledge)

Deployment and Tools: FastAPI, REST APIs, Git, GitHub, VS Code, Vercel, Hugging Face Spaces

Top Projects

Portfolio - AI Powered Portfolio Website with Personalized Chatbot 🔗: Developed a full-stack AI portfolio using React and FastAPI with a personalized chatbot trained on a custom Q&A knowledge base. Implemented a retrieval-augmented generation (RAG) pipeline using SentenceTransformers and a fine-tuned T5 model, and deployed the system on Vercel and Hugging Face Spaces for real-time interaction.

Shopping Hard or Hardly Shopping - Customer Behavior Segmentation (Major Project) 🔗: Led a final-year e-commerce analytics project that segmented users from clickstream data by building an end-to-end ML pipeline using Python and Pandas, applying feature engineering and PAM clustering to derive numerical behavior vectors and identify buyers, browsers, and cart abandoners, with insights visualized in Matplotlib.

ML Drift Monitor - Machine Learning Monitoring System 🔗: Built an end-to-end ML monitoring pipeline that trains models on tabular datasets and detects feature and prediction drift using KS tests and Population Stability Index (PSI), generating automated drift reports for model reliability.

Achievements & Certifications

Top Coder - College Coding Tracker 🔗: Ranked in the top 7% (81st out of 1,132 students) in the college coding leaderboard, demonstrating strong problem-solving ability, algorithmic thinking, and consistent competitive programming performance.

CodeChef - Competitive Programming 🔗: 2-star rated competitive programmer with 1500+ problems solved and 50+ contest participations, maintaining daily problem-solving practice to strengthen algorithms, data structures, and coding efficiency.

Machine Learning Specialization by deeplearning.ai 🔗: Gained practical expertise in supervised and unsupervised learning, deep learning fundamentals, neural networks, optimization techniques, and model evaluation using Python, Scikit-learn, and TensorFlow.

Smart Coder by Smart Interviews 🔗: Certified in Advanced Problem Solving and Data Structures by Smart Interviews, demonstrating strong skills in algorithms and technical problem solving.
